DIMESALE**

Creating A
Dimesale
Has Never
Been So
Easy

1-2-3 DimeSale HELP GUIDE

Hi!

Thanks for purchasing **1-2-3 Dimesale**, the tool that allows you to create a dimesale in 3 simple steps.

Preparation:

Before you start using the software, prepare your 'sales-' and 'thankyou'-page and upload them to your server.

Make sure your sales page has the extension .php!

(You can easily change a .html page into a .php page, simply by opening the page with a HTML-editor, and saving it again as a .php file)

Double click the icon to open the software. You'll be presented a window showing a page that contains some info on how to use the software, and some interesting links.

Make sure you read the 'License' file

Click the '*Close*' button at the bottom to open the software.

Follow the instructions provided.

When you've answered all questions, click the '*Copy To Clipboard*' button to copy the generated code.

Then, paste the code in your sales page, where you want your payment button to appear.

Save your sales page (.php!!!)

Upload your sales page to your server, replacing the existing one.

(Additionally, you can encrypt your sales page code to avoid people being able to see – and change - your PayPal button code)

That's it! Your dime sale is ready!

Good Luck!
